

### **Construction Update – 2<sup>nd</sup> June 2017**

Next week we will commence installing rock anchors on the lower elevation of Locomotive Street. This will involve drilling 4 meters below Locomotive Street level. Full access for the street will be maintained at all times.

We will also have machinery operating within the building 2 footprint to break up the large pieces of existing concrete.

This work commences Tuesday 6<sup>th</sup> June and we anticipate that it will continue for up to 3 weeks.

You may experience some noise during this work. Every effort will be made to reduce the impact and get the work completed in the shortest time possible.

If you have any questions or concerns, or if you require more information, please contact me at [atp.communications@mirvac.com](mailto:atp.communications@mirvac.com) or call **1800 870 549**.

Kind regards, Kim
